This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFATORY NOTE

September 1, 1916, the Library of Congress addressed the following circular letter to 232 historical societies, university and public libraries, and other learned institutions in the United States:

> DEAR SIR: The Library of Congress is desirous of having in its files information of the location of the important collections of the papers of prominent Americans, civil, religious, and military. It would, therefore, appreciate a list of such collections of original manuscripts in your custody, giving the inclusive dates and descriptive title of the individuals whose papers are listed.
>
> We do not ask for a list of all of your collections of personal papers, but merely for a list of those whose historical importance or size justify mention.
>
> We inclose a list representing such selected collections of personal papers in the Library of Congress, for your information and as an example of what is desired.
>
> A return envelope is inclosed upon which no postage is necessary.

Eighty-six answers were received and by June 1917 the replies ceased coming in. The amount of information obtained from these replies by no means can be considered a complete survey of the important collections of personal papers of prominent Americans, yet it is sufficient to justify publication as a check list of value to institutions and historical investigators.

The information is presented in three groups: First, alphabetical; second, chronological; and, third, institutional. The chronological group is presented by decades for space-saving convenience and because it is believed that such a division will fully satisfy the demands of the investigator.

The Library of Congress acknowledges its indebtedness to the institutions which, by replying to its circular, made this publication possible. It would, of course, appreciate at all times information as to the location of collections of papers of prominent Americans.

J. C. FITZPATRICK
Acting Chief, Manuscript Division

HERBERT PUTNAM
Librarian of Congress
Washington, D. C., June, 1918

ALPHABETICAL LIST

Adams, John Quincy: Papers, 1802–1846, Library of Congress; 1817–1845, Yale University Library.

Adams, Sherman T.: Collection, 1755–1761, Connecticut State Library.
